

**Job Description:** Senior Analyst / Manager

**Position Type:** Full-time

**Office Location:** 5425 Wisconsin Ave, Suite 600, Chevy Chase, MD 20815

**About K&M Advisors:**

K&M is an internationally-recognized infrastructure finance and engineering advisory firm. Since its creation in 1986, K&M has advised private investors, multilateral agencies, and governments on the development of power, water, and telecommunications projects valued at over US\$30 billion. K&M provides a range of technical and commercial consulting services, including transaction advisory, project development advisory, due diligence, and Owner's and Lender's Engineer services. K&M has played a leading advisory role in the development of nineteen (19) Independent Power Producer (IPP) projects that reached financial close, including the implementation of the first IPPs in seven developing countries. K&M is owned by the Dorado Group, a private developer, owner, operator, and manager of IPPs.

K&M Advisors is looking for a full-time Senior Analyst or Manager to play an active role in supporting K&M's advisory services. Working directly with K&M's consulting team, the Senior Analyst or Manager will be responsible for supporting the following activities: economic analysis (including cost-benefit analysis and LCOE calculations); financial modeling for power generation or LNG projects; electricity market analysis; assisting with investor due diligence of power projects; topical research to support various work streams; producing professional-grade written reports and presentations, and developing new business opportunities through the preparation of expressions of interests and proposals. In this role, the Senior Analyst or Manager will gain exposure to all areas of K&M's business and will have the opportunity to work on a variety of projects around the world while gaining experience with a range of conventional and renewable power generation technologies.

**Candidate Profile:**

The ideal candidate would be someone who:

- Is interested in power generation and LNG to power, and has some exposure or knowledge of the sectors through previous work experience
- Is skilled at using Excel, and has demonstrated experience developing financial models, including: project finance models, pro-forma financial statement forecasts, levelized cost of electricity calculations, and cost-benefit analyses
- Possesses excellent writing skills, including the ability to deliver high-quality, professional written material in English which is grammatically correct and displays a high attention to detail

- Has excellent verbal communication skills, including the ability to articulate complex concepts and present analytical material to a variety of audiences, and is able to prepare effective PowerPoint presentations
- Knows corporate finance (and micro-and macroeconomics) concepts and can apply these to real-life projects
- Can work effectively with peers, senior colleagues, and managers, and has the ability to manage and deliver on multiple work streams
- Has a basic understanding of common power generation technologies, and how power generation markets work
- Is willing and able to travel internationally for periods of one or two weeks at a time
- Has a graduate degree in a relevant field, which includes economics, finance, or business
- Is interested in growing professionally in a long-term career, whilst maintaining a sustainable work-life balance.

**Minimum Qualifications:**

- Bachelor's degree in business, economics, finance or related field with a GPA of 3.3 or higher
- At least 5 years of relevant work experience
- Excellent English (oral and written) communication skills

Only applicants with valid work authorization in the U.S. will be considered.
